DETAILED ACTION

The amendments filed October 8, 1994; August 25, 1995; June 10, 1996 and March 12, 2009 proposes amendments to claims 1-42 that do not comply with 37 CFR 1.173(b), which sets forth the manner of making amendments in reissue applications. A supplemental paper correctly amending the reissue application is required. All pending claims must be submitted in the proper re-issue format.

Changes made in the certificate of correction to the original patent were made prior to the filing of the reissue application. Applicant has failed to incorporate all the changes made by the certificate of correction into the reissue application. See MPEP section 1411.01.

The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. The only oath on file is the original oath; the error statement in the original oath refers to an error corrected by the re-exam certificate and is therefore an "error" that has already been corrected. Applicant must identify an error currently being corrected by the claims that would be allowed in the application. See MPEP section 1414, sections B and C.

Claims 1-42 are rejected as being based upon a defective reissue oath under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the oath is set forth in the discussion above in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references of the original patent 5,088,484 must be recited in the reissue application.
